Have you got a personal statement?

A personal statement, is a chance for you to articulate why you would like to study a particular course or subject, and what skills and experience you possess that show your passion for your chosen career. A personal statement is part of your application, whether it be for an apprenticeship, sixth form, college or university.

Your personal statement should consist of the following:

- a. Why are you applying for your chosen course/apprenticeship?
- b. Why do you think you are suitable for the course/apprenticeship?
- c. Do your current studies or experience relate to the course/apprenticeship you have chosen, if so, how?

Why not have a go at drafting and preparing a personal statement for either college course, apprenticeship or part time job.

Click on the link below for some guidance on how to get started, once you have done it email it to your coach for some feedback.

Learning a new skill? We want to see it...

Take a photo of you learning a new skill or mastering an old one. Whether you are learning to cook, play the guitar, dance, write poetry or code. We would love to see it! 

Coping Calendar...

Why not have a go at trying 30 days of actions, in our coping calendar. It is a great way to care for yourself and others. As you tick each action as completed, share your progress with your coach and your peers at ThinkForward.
